## Invitation

Greetings to all,

It is our pleasure to announce the 19th Annual conference of ISECT on February 22-23rd, 2019 to be held in Ideal Beach Resort, Mahabalipuram, Chennai. Set along the Bay of Bengal, sprawled across 12 acres of lush greenery, with a private beach, furnished with huts and hammocks, surrounded by swaying coconut trees, one needs to look no further when breaking away from the hubbub of city life. Located merely two and a half kilometres from the cultural town of Mahabalipuram and the historical world heritage UNESCO sites.

Over the past 19 years the Annual conference has become the premier gathering for perfusionists to showcase their success stories, network with peers, develop organisational partnerships and hear from speakers willing to share their tips, techniques and experiences for the benefit of our profession.

Through the Annual conference we aim to provide attendees with practical, hands-on experiences so they can return home with relevant, actionable plans to improve their clinical efforts. Speakers will present topics which have real-world application for perfusionists and which will help all of us address the challenges and shape the future of perfusion technology in India.

The annual conference on perfusion technology also provides an exciting opportunity for sponsoring organisations to showcase their products and services to perfusionists from across the country. It is a matter of pride that this would be enriching everyone with adequate knowledge. Moreover, this turns out into an experience both meaningful and memorable for all involved.

We look forward to seeing you in Mahabalipuram.
